

We make *technology work for you.*

Tetrad Solutions is a technology services provider with a proven track record of delivering on time, on budget, and on target solutions that specifically meet client needs. Our focus goes beyond designing cutting-edge technology applications – we strive to thoroughly understand each client’s objectives before generating customized plans and solutions. Our client-focused approach includes:

- ◆ Identifying, analyzing, and defining the problem.
- ◆ Outlining the necessary steps to achieve an appropriate solution.
- ◆ Evaluating and presenting alternatives.
- ◆ Establishing and meeting milestones.
- ◆ Tracking and reporting performance.
- ◆ Implementing solutions.
- ◆ Providing follow-up services, including training, knowledge transfer and/or application corrections, if necessary.

Tetrad Solutions offers a comprehensive suite of technology application services, from business process redesign to our latest offering: Operational Processing for Unix. This solution is an operational program that executes and manages mainframe batch processing in an open systems environment. It removes the guesswork and frustration otherwise encountered when migrating from a mainframe to an open systems platform. Additional features include: multiple report distribution options, multiple input queues, job archival processing, all through a web interface.

Additional Tetrad services include:

- ◆ Project management
- ◆ Migration of mainframe applications to open systems
- ◆ Application design, development or enhancement
- ◆ Web enablement
- ◆ Database services
- ◆ Unix system support
- ◆ Architectural integration services
- ◆ Outsourcing analysis
- ◆ Applications conversion and implementation
- ◆ Data warehouse design and development
- ◆ Software AG toolset expertise
- ◆ Higher education specialist
- ◆ JAD facilitation
